Poland

**Business cooperation between CV. Bintang Areng and ScopeDome Poland**

To whom it may concern:

This is a reference statement for the above mentioned business partners.

CV. Bintang Areng has been operating for more than a decade, selling and installing Astronomical Instruments and Buildings (Domes, Sliding Roof, etc.) in Indonesia and SouthEast Asia.

The cooperation between ScopeDome Poland and CV. Bintang Areng started out in April of 2017 and has been a fruitful business relation ever since. We are really delighted to be able to form a business cooperation with ScopeDome, considering their commitment as a dedicated and innovative partner, we are looking forward to future endeavors.

ScopeDome's capability as a supplier of high quality parts and systems for Astronomical operations are proven through their products and services.

The products and services work very well together and are considered to be of outstanding quality. Their remote support is very helpful for solving some on field problems.

With kind regards,

Sri Wakhidah Rahayuningsih  
Director CV. Bintang Areng
